Journal of Mathematics and Physics

(Founded by C. L. E. Moore)

Volume XLVII

1968

Board of Editors

E. REISSNER, *Managing Editor*

G. BIRKHOFF
B. BUDIANSKY
G. F. CARRIER
S. H. CRANDALL
H. FESHBACH
H. P. GREENSPAN
L. N. HOWARD
C. C. LIN
P. M. MORSE
R. F. PROBSTEIN
E. REISSNER
J. L. SANDERS
C. E. SHANNON
L. TRILLING

Published Quarterly at Mt. Royal & Guilford Aves., Baltimore, Md., 21202 for
Massachusetts Institute of Technology

TABLE OF CONTENTS—VOLUME 47

On Axial Extension and Torsion of Helicoidal Shells
By E. Reissner and F. Y. M. Wan 1
On the Interaction of a Two-Dimensional Jet with a Parallel Flow
R. C. Ackerberg and A. Pal 32
Some Problems of Thin Circular Cylindrical Shells II. The Infinite Crack
By V. T. Buchwald 57
On the Accuracy of "Interior" Solutions of the Reduced Wave Equation in a Plate-Like Region
By D. R. Westbrook 67
A Wiener-Hopf Solution of a Radiation Problem in Conical Geometry
By D. C. Pridmore-Brown 79
A General Theorem for Thin Shells in Classical Plasticity
By J. Schroeder and A. N. Sherbourne 95
Corrigenda to "Some Problems in Two-Dimensional Electrostriction"
By T. E. Smith and W. E. Warren 109
Singular Perturbations of a Class of Nonlinear Hyperbolic and Parabolic Equations
By J. D. Murray 111
On a Differential Equation of Boundary Layer Type
By Carl E. Pearson 134
Reciprocal and Canonical Forms of Variational Problems Involving Linear Operators
By G. C. Pomraning 155
Self-Convection in Plane Flow Due to a Source Singularity of Heat
By W. P. Kotorynski 170
A Method of Solution for Higher Approximation of Boundary Layer Flows
By Chen-Chi Hsu 185
Scattering by an Expanding Conducting Sphere
By John Lam 199
A New Table for a Modified (Half Range) Gauss-Hermite Quadrature with an Evaluation of the Integral $\int_0^\infty e^{-u^2-(a/u)}\,du$
By A. Ben Huang and Don P. Giddens 213
A Note on the Paper "Evaluation of the Integral $\int_0^\infty u^m e^{-u^2-(a/u)}\,du$ by the Discrete Ordinate Method"
By A. B. Huang 219
An Extension of an Inequality Involving Modified Bessel Functions
By A. L. Jones 220
Errata: Dynamical Displacements in an Infinite Elastic Space and Matched Asymptotic Expansions
By R. P. Kanwal 222
Initial Post-Buckling Behavior of Cylindrical Shells under External Pressure
By B. Budiansky and J. C. Amazigo 223
Yielding and Brittle Cracking of an Orthotropic Strip
By Bill R. Baker 236
Bounds for Unsymmetrical Yield Point Loads of Thin Shells
By J. Schroeder and A. N. Sherbourne 249
The Viscoelastic Potential and Its Thermodynamic Foundations
By K. C. Valanis 262
Effect of Plate Thickness on the Bending Stress Distribution Around Through Cracks
By R. J. Hartranft and G. C. Sih 276
The Incompressible Laminar Axisymmetric Far Wake
By Stanley A. Berger 292

Effects of Combined Two-Dimensional Shear and Normal Strain on Weak Locally Homogeneous Turbulence and Heat Transfer
By R. G. Deissler 310
Incompressible Flow Around Porous Two-Dimensional Sails and Wings
By R. Barakat 327
On Non-Linear Ordinary Differential Equations of Boundary Layer Type
By Carl E. Pearson 350
Notes on O(4) Representations
By R. T. Sharp 358
Potential of a Charged Sphere Inside a Grounded Cylindrical Tube
By I. C. Chang and I. Dee Chang 365
Effects of Plate Thickness on the Bending of an Elastic Plate Containing a Crack
By Neng-Ming Wang 371
A New Approach to 'Not-So-Slender' Wing Theory
By Kuo Chang Wang 391
Uniform Asymptotic Expansions for Prolate Spheroidal Wave Functions
By William Streifer 407
Towards a Generalization of "Minimum Free-Energy" Applicable to Statistically Steady Turbulent Motion
By Melvin E. Stern 416
Two Variational Theorems for Thin Shells
By Frederic Y. M. Wan 429
On Serrin's Generalization of Harnack's Inequality
By Ray Redheffer 432
The Reynolds Number Similarity Argument
By A. E. Gill 437
Solution of the Inhomogeneous Helmholtz Equation with Lebedev Transform
By J. H. Smith 442
A Note on the Drag of an Impulsively Started Circular Cylinder
By Chang-Yi Wang 451
Multipole Flows of a Viscous Fluid Exterior and Interior to a Circular Cylinder
By K. B. Ranger 456
Canonical Forms of Gravitational Field Equations in Empty Space
By Dang Hong Tiem 461
